Web Developer

Ruby, Javascript, JQuery,
RSpec, ActiveRecord, Rails,
Sinatra, PostgreSQL, SQL,
SQLite, Sass, d3charts,
JQueryUI, Git, SVN

Experience

Makersquare

A selective and immersive developer course, aimed to train full stack developers with strong emphasis on software design principles and test driven development.

Ruby, Javascript, JQuery, ActiveRecord, Rails, Sinatra, PostgreSQL, SQL, SQLite

Projects

Hundred Million Mile Club (Fullstack)

For a non profit charity who works directly with schools encouraging children to exercise and be fit. The web app lets users track progress of the miles kids ran for each day or week. All school activity is added to a inhouse national database for statistics.

Ruby, Javascript, JQuery, Sass, ActiveRecord, Rails, PostgreSQL, d3charts

WinningFood (Frontend)

Winning food is a web app that improves on the Yelp map using smarter visual cues. Scraping data from the Yelp API to find the numeric rating and increasing the size of the map marker for the restaurant. Letting consumers see the popularity of the restaurant from the map itself. Without traversing through the left sorted list. Creating a smarter user experience.

Javascript, JQuery, Sinatra, Yelp API, Googlemaps API

Professional History

Predictable Data (Front End Developer) 2013

- Designed and developed a responsive object oriented web interface for a cloud based data quality application.
